LINCOLN BOULEVARD PROJECT CLOSURES SCHEDULED

MARINA DEL REY – Work is scheduled to begin on Thursday, October 13 at the intersection of Lincoln Boulevard (Route 1) and Sepulveda Boulevard, where construction involves modifications and improvements to the center medians as well as lighting and signal improvements.

For approximately the next four months, this work will reduce the northbound lanes at the intersection from three to two. Also, southbound Sepulveda Boulevard at the intersection of Lincoln Boulevard will be reduced from four lanes to three.

The work is part of a \$9 million project to widen and realign Lincoln Boulevard from LMU Drive to Bali Way, and improve the intersection of Lincoln Boulevard and Sepulveda Boulevard. When this project is finished, anticipated by mid-2007, it will increase capacity, improve traffic flow, and provide improved traffic circulation on this busy north/south corridor.
